Dear Sir/Madam

This is to confirm that placement and compaction of fill material, completed by BMD Urban, on **Lot 2102** within Virginia Grove Stage 14 & 15, was supervised by Construction Sciences under Level 1 arrangements as described in AS3798-2007 "Guide-lines on earthworks for commercial and residential developments". Areas and depth of works as per 20A0272.C0014 Post Fill Survey (0) & 20A0272.C0014 Post Topsoil Strip (0)

This indicates that the fill was compacted to at least the minimum density ratio in accordance with the specification requirements and it is considered that the fill may be deemed to be "controlled fill" in accordance with AS 2870-2011 "Residential Slabs & Footings".

It may be that non-structural topsoil was placed on the block after completion of the structural fill. This would need to be removed as part of the site preparation for building and driveway construction.

Please do not hesitate to contact me if you have any queries.

Yours faithfully,

Sam Hardy
